## THE COMPANY

**MICRO LYNX SYSTEMS ENTERPRISES** was established in August 27, 2005 and started its actual operation in December 16, 2005, located in Las Piñas City, Philippines.

An engineering company with expertise in the field of Electrical and Fire Protection System with a veteran design consultant, project manager, engineer, and technicians has the knowledge and skills necessary to handle the most difficult electrical and fire protection system project.

Fire protection has become more sophisticated over the years. It's also become more complicated. Fire codes change. Detection technologies advance. Extinguishing methods evolve. Environmental issues arise.

**MICRO LYNX FIRE PROTECTION SYSTEM** can carefully guide you through this maze. We work with you to provide the right fire protection for your business. Whether it's a single fire extinguisher or the design, installation and maintenance of your building's fire protection system, our solution will not only meet code, but also meet your budget.

We invite you to learn about each of these in detail. You'll see fire protection isn't complicated once you have the right partner.

**MICRO LYNX FIRE PROTECTION SYSTEM** is the only source you need for accurate fire protection systems, an extensive line of fire protection products and fire fighting systems.
